Education

Bachelor of Technology - Computer Science (Artificial Intelligence and Machine Learning), 2027
Supreme Knowledge Foundation Group of Institutions (Affiliated to MAKAUT ,WB) – Hooghly, WB
• Current GPA 7.22(Upto 4th Semester)Average of all Sem

Higher Secondary Education: PCM & CS, 2023
Uttarpara Amarendra Vidyapith - Hooghly, WB
• WBCHSE Board • Percentage: 61.6%

Secondary Education, 2021
Uttarpara Amarendra Vidyapith - Hooghly, WB
• WBBSE Board • Percentage: 79.71%

Technology & Skills

Programming Languages: Python, Java, C/C++, JavaScript, Dart, SQL
AI/ML & Data Science: Machine Learning, Artificial Intelligence, Computer Vision, Transfer Learning, CNN, LSTM, Data Analysis, Pattern Recognition, Explainable AI (Grad-CAM, SHAP), LangChain (GPT-4, GPT-3.5)
Web & Mobile Development: React.js, Flutter, HTML, CSS, REST API Development, FastAPI, Streamlit, Android Studio
Databases & Cloud: Firebase Firestore, Firebase Authentication, MySQL, PostgreSQL, SQLite
Frameworks & Libraries: PyTorch, Scikit-learn, OpenCV, NumPy, Pandas, MATLAB
Tools & Platforms: Git, Google Colab, Google Earth Engine, Linux, Render (deployment)
Core Computer Science: Data Structures & Algorithms, Operating Systems, Database Management Systems
Professional Skills: Analytical Problem Solving, Technical Communication, Project Management, Team Collaboration

Certifications

English Language for Competitive Exams, NPTEL (IITM), *Ethics in Engineering Practice,* NPTEL (IITKGP) , *Communication in the 21st Century Workplace*, Coursera (UOC, IRVINE) , *Enhancing Soft Skills and Personality*, NPTEL (IITK) , *Introduction To Internet Of Things*, NPTEL (IITKGP) , *Introduction To Machine Learning*, Duke University

Projects

Web Based Pharmacy Management System **April,2025**
Tech: Python, Tkinter, MySQL
- Developed a desktop application for pharmacy inventory, billing, and customer record management.
- Implemented Admin and Pharmacist authentication with MySQL database integration.
- Designed GUI using Tkinter and implemented CRUD operations for medicine data.

Clean Route – Al-Enabled Smart Waste Management and Route Optimization System – Android APP **Nov,2025**
Tech: Flutter, Firebase, Python, Java, REST API
- Built a cross-platform Flutter app for waste collection route monitoring.
- Integrated Firebase for real-time database and authentication.
- Developed Python APIs for route optimization and backend processing.

OncoScan XAI – Explainable Multi-Modal Transfer Learning Framework for AI-Assisted Breast Cancer Detection **[Currently Working]**
Tech: Python, PyTorch, Radiomics, ResNet50, EfficientNet-B0, OpenCV, Scikit-learn, FastAPI, React.js, Firebase , Grad-CAM, SHAP, REST API
- Developed an AI-assisted breast cancer detection system using multi-modal mammography and MRI imaging data.
- Implemented transfer learning using pre-trained CNN models for medical image classification.
- Built a multi-modal feature fusion pipeline to improve prediction accuracy.

Disclaimer
I Solemnly declare that all the above information is correct to the best of my knowledge & belief.

www.krishnendughosh.in

- Applied Explainable AI techniques (Grad-CAM, SHAP) for model interpretability and visualization.
- Developed REST APIs using Python (FastAPI) for model inference and prediction services.
- Designed React.js frontend for image upload, prediction visualization, and report generation.
- Integrated Firebase for secure cloud storage and patient data management.
- Implemented preprocessing techniques including normalization, resizing, and feature extraction.

AgriVision – AI-Driven Precision Agriculture Monitoring Platform-Android App **Sept 2025**

Tech: Python, FastAPI, Flutter, Firebase, MATLAB, CNN, LSTM, Google Earth Engine, OpenWeather API

- Developed an AI-based precision agriculture platform using hyperspectral imaging and environmental sensor data for crop health monitoring.
- Built Python FastAPI backend and Flutter mobile dashboard with Firebase database integration.
- Implemented CNN and LSTM models for vegetation stress prediction and pest risk analysis.
- Integrated weather API, soil sensor data, and spectral health maps for real-time farm insights.
