Bachelor of Technology - Computer Science (Artificial Intelligence and Machine Learning), 2027
Supreme Knowledge Foundation Group of Institutions (Affiliated to MAKAUT ,WB) – Hooghly, WB

- Current GPA 7.45(Upto 5th Semester)Average of all Sem

Higher Secondary Education: PCM & CS, 2023

Uttarpara Amarendra Vidyapith - Hooghly, WB

- WBCHSE Board
- Percentage: 61.6%

Secondary Education, 2021

Uttarpara Amarendra Vidyapith - Hooghly, WB

- WBBSE Board
- Percentage: 79.71%

Technology & Skills

Programming Languages: Python, Java, C/C++, JavaScript, Dart, SQL

AI/ML & Data Science: Machine Learning, Artificial Intelligence, Computer Vision, Transfer Learning, CNN, LSTM, Data Analysis, Pattern Recognition, Explainable AI (Grad-CAM, SHAP), LangChain (GPT-4, GPT-3.5)

Web & Mobile Development: React.js, Flutter, HTML, CSS, REST API Development, FastAPI, Streamlit, Android Studio

Databases & Cloud: Firebase Firestore, Firebase Authentication, MySQL, PostgreSQL, SQLite

Frameworks & Libraries: PyTorch, Scikit-learn, OpenCV, NumPy, Pandas, MATLAB

Tools & Platforms: Git, Google Colab, Google Earth Engine, Linux, Render (deployment), Vercel ,Nectlify

Core Computer Science: Data Structures & Algorithms, Operating Systems, Database Management Systems

Projects

AgriVision – AI-Driven Precision Agriculture Monitoring Platform-Android App **Sept 2025**

Tech: Python, FastAPI, Flutter, Firebase, MATLAB, CNN, LSTM, Google Earth Engine, OpenWeather API

- Built a precision agriculture system leveraging hyperspectral imaging, environmental sensors, and weather APIs, with CNN/LSTM models for crop health, vegetation stress, and pest risk prediction.
- Developed a FastAPI backend and Flutter mobile dashboard integrated with Firebase to deliver real-time farm insights using spectral data and soil/weather inputs.

Clean Route – AI-Enabled Smart Waste Management and Route Optimization System – Android APP

Tech: Flutter, Firebase, Python, REST API

Nov,2025

- Developed a cross-platform Flutter application with Firebase integration for real-time waste collection monitoring, including authentication and database management.
- Implemented Python-based backend APIs for route optimization and efficient waste collection planning.

TextSage AI – Intelligent Text Summarization Tool(Web App) Live- <https://textsage.krishnendughosh.in/>

Tech: React.js, Tailwind CSS, Python,Node.js, FastAPI, REST API

Feb, 2026

- Developed an AI-powered NLP platform for summarization, sentiment analysis, and classification by implementing pipelines for keyword extraction, entity recognition, and semantic analysis.
- Built scalable backend APIs for real-time processing and a responsive React frontend, optimizing preprocessing and inference to support applications like document summarization, review analysis, and research assistance.

OncoScan XAI – Explainable Multi-Modal Transfer Learning Framework for AI-Assisted Breast Cancer Detection **[Currently Working]**

Tech: Python, PyTorch, Radiomics, Densenet121,Scikit-learn, FastAPI, React.js, Firebase , Grad-CAM, SHAP, REST API

- Developed an AI-assisted breast cancer detection system using multi-modal MRI and mammography data, implementing transfer learning (Densenet121) with feature fusion to improve classification performance.
- Integrated Explainable AI techniques (Grad-CAM, SHAP) for interpretability, and built an end-to-end pipeline including preprocessing, FastAPI-based inference APIs, React frontend for visualization/reporting, and Firebase for secure data management.
